Year of defense: 2014

Number of pages: 95

Number of annexes: 10

Key words: Myocardial infarction, Atherosclerosis, First aid, General public,
Resuscitation

Abstract

The topic of the bachelor's work is a non-professional first aid to people struck by myocardial infarction. The work is divided into theoretical and practical parts. The theoretic part provides compact overview of the issues linked to myocardial infarction. It consists of the anatomy of a heart, myocardial infarction, high-risk factors, causes, symptoms, prevention, diagnostic and medical treatment. Further on it includes main urgent first aid and professional first aid. Practical part follows up a research, which main target was to gain and assess theoretical knowledge of non-professional public of first aid given to person struck by myocardial infarction. To gain and further processing of data was used a questionnaire method. Professional information included in this bachelor's work was derived from technical literature and are mentioned in the list of used literature.
